Assumptions:

The renter may choose a different date when a facility is not available or stop. Availability is checked again after a new date. Contact information is entered only when the facility is available. School Staff only approve or reject. Payment Service and Email Service are not separate swimlanes: the Website calls them, so charge and email actions sit in the Website Lane. They are participants in the sequence diagram. A booking is saved only after payment succeeds. Payment-company steps inside the Payment Service are not shown.
